

Bat Conservation and the Role of Veterinary Medicine

Speaker: Dianne Odegard, Director, Co-Founder AUSTIN BAT REFUGE & Public Outreach and Education Manager, Bat Conservation International www.Batcon.org

The Congress Avenue Bridge bat colony is a famous eco-tourism attraction in Austin, but Bat Conservation International (BCI) works worldwide to protect bats and their habitats. Bats are suffering from lack of understanding, increases mortality from White-nose syndrome and wind turbines and habitat loss. Dianne Odegard welcomes the opportunity to speak with veterinarians to increase their understanding of this underappreciated animal and to encourage veterinary participation in bat conservation.
