Clinical Veterinarian
The University of Tennessee Health Science Center
Memphis, TN
03/28/2024

The Department of Comparative Medicine and the Laboratory Animal Care Unit at the University of Tennessee Health Science Center invite applications for position as a clinical veterinarian. Opportunity also exists for a faculty position within the Department of Comparative Medicine. Salary and academic status are negotiable and commensurate with experience and qualifications.

Candidates must have a DVM or equivalent degree from an AVMA-accredited institution or certification by the Educational Commission for Foreign Veterinary Graduates (ECFVG) or the Program for the Assessment of Veterinary Education Equivalence (PAVE) and specialty training in laboratory animal medicine. Board certification in laboratory animal medicine by the American College of Laboratory Animal Medicine (ACLAM) is highly desirable. Experience in independent or collaborative research is preferred.

The position includes responsibility for maintaining a strong service program that is consistent with federal guidelines and accrediting agency requirements, educational programs in animal medicine and science, shared surgical and clinical duties, collaborative research, research consultation, and certain institutional regulatory compliance duties. Teaching responsibilities include lectures, seminars, workshops, and laboratories to research technicians, graduate students, residents, animal care staff, and faculty. The Department of Comparative Medicine at the University of Tennessee Health Science Center is an academic department administratively reporting to Dean of the College of Graduate Health Sciences; the Laboratory Animal Care Unit supports the service operations and reports to the Vice Chancellor for Research/Chief Research Officer for the campus. The Department and Laboratory Animal Care Unit support over 100 investigators in an AAALAC-accredited animal program that encompasses over 65,000 square feet of animal research space in 6 buildings. Academic programs include formal graduate courses and an ACLAM-recognized residency training program in laboratory animal medicine.
