Clinical Veterinarian, Emory University, Atlanta, GA

The Emory University School of Medicine has an immediate opening for a veterinarian to join a well-established, AAALAC-accredited program. Responsibilities involve the comprehensive practice of laboratory animal medicine, anesthesia and surgery support services for surgical models and clinical care of large animals, rodents, and non-traditional species. The position will include research support, IACUC participation, and didactic and clinical training of laboratory animal veterinary residents. Additional responsibilities could include supervision of technical staff and/or oversight of the rodent managed breeding services.

Qualifications: Candidates should have a strong knowledge and/or interest in laboratory animal medicine and management and must be qualified by licensure to practice veterinary medicine in at least one state. Specialty training in laboratory animal medicine and eligibility to sit for the American College of Laboratory Animal Medicine board exam are required. Salary, title and any academic appointment will be commensurate with training and experience.

The requisition is now open and applicants are invited to apply at the following URL. https://faculty-emory.icims.com/jobs/110365/associate-staff-vet-scientist---assistant-staff-vet-scientist/job. The position will remain open until a suitable candidate is found.

To confirm interest and with any questions contact Vanessa Lee, DVM, DACLAM, vlester@emory.edu.
