Staff Veterinarian

Please apply at: Staff Veterinarian - Taconic Biosciences, Inc. - Career Page (applytojob.com)

Are you someone who enjoys working in a fast-paced environment while ensuring animal welfare? Have you worked in a research environment and completed a laboratory animal medicine residency? Are you resilient and self-motivated, and do you have a desire to practice hands-on clinical medicine in a production setting for rodents? If you answered yes to all of these, we want to hear from you!

Taconic Biosciences is looking for an enthusiastic individual to fulfill a Staff Veterinarian role focused in clinical and preventive care. This role will join Taconic’s dedicated Animal Quality team onsite at the Germantown, NY and Rensselaer, NY facilities with availability to work remote 2 days per week.

The Pay Band: $125,000 - $140,000, exact compensation may vary based on skills, experience, and location.

What we offer:
- Insurance within 30 days or less which includes options for medical, dental, vision, pet insurance and more!
- 20 days paid time off plus 6 additional holidays and 1 floating holiday
- Annual Bonus Program
- Work life balance
- 401(k) plan with up to 4% employer match
- Tuition reimbursement
- Commitment to training and providing you with the skills you need for success
- Coverage of licensing fees, relevant professional dues, and one CE event annually
- Career advancement opportunities
- All employees receive access to 24/7 telemedicine (including mental health), short- and long-term disability and life insurance

If you are looking for a rewarding career and the opportunity to grow, apply today!

The Role:
The Staff Veterinarian will be responsible for rodents only, focusing on clinical and preventive care with an emphasis on strategic projects to enhance animal welfare. They will work with a global team of professionals across all functional areas of the company. While the position has core responsibilities, it must also meet the ever-changing demands of a growing business. If you are resilient, self-motivated and want to practice hands-on clinical medicine in a production setting, apply today!

Duties of the Staff Veterinarian include the following:
- Serves as primary Veterinarian onsite for health monitoring, animal welfare, and clinical care at both NY locations.
- Works with veterinary nurses to provide guidance on clinical cases, treatments, and diagnostic options.
- Prioritizes development of monitoring programs to optimize micro- and macro-environmental factors in animal housing areas.
- Focuses on care for immunodeficient/genetically engineered/induced disease models.
- Maintains biosecurity practices and health standards between sites.
• Supports program to screen for and address development of adverse phenotypes.
• Performs protocol review, semiannual inspections, and post approval monitoring.
• Reviews and updates SOP’s related to veterinary care as needed.
• Responds to customer inquiries concerning veterinary care and general questions concerning Taconic animals.
• Assists with training opportunities for animal care staff.
• Drafts quarterly animal welfare newsletter.
• Contributes to scientific advancement and learning by attending and presenting material at conferences relevant to the field of laboratory animal medicine.
• Collaboration with international teams including customers and our veterinary staff in Germany and Denmark.
• Trends and analyzes data to identify areas needing improvement and prioritize animal care.
• NY signatory for international shipments.

Education and Experience:
• Doctor of Veterinary Medicine (DVM) from AVMA accredited school.
• Licensure to practice veterinary medicine in at least one state with expectation to obtain NYS Veterinary license within 3 months of hire and USDA Accreditation or ability to become USDA accredited within 6 months of hire.
• Minimum 2 years relevant experience and/or training.
• Completion of a formal residency training program in laboratory animal medicine program and eligibility to sit for the ACLAM board exam.
• 2 years’ experience working with humanized and immunodeficient rodent models preferred.
• Ability to communicate effectively with all levels of an organization.

Travel:
Occasional travel is required, generally 2 -5 trips each year.

About Us:
With a history of over 65 years of excellence, Taconic Biosciences is a global team of the best problem solvers in the industry. We partner with our clients to develop winning research strategies that accelerate the discoveries for prevention and treatment of disease.

Taconic employees all over the world show up every day to deliver the best solutions for our clients while caring for ourselves, each other, and especially our animals. If you are a respectful, compassionate individual with a can-do attitude and a desire to do the right thing, we want you to join us!

Better Together at Taconic
