Research Postdoctoral Fellowship

The Department of Molecular and Comparative Pathobiology in the Johns Hopkins University School of Medicine invites applications from veterinarian scientists (holding a DVM/VMD and either a PhD or other advanced research training) for a three-year research postdoctoral fellowship beginning September 2024. This position offers an exceptional opportunity for developing a biomedical research career by training available in a wide variety of disciplines at Johns Hopkins. Additional training in comparative pathology and laboratory animal medicine are available to complement research training. Candidates must have a DVM or equivalent degree from an AVMA accredited institution and be a citizen or permanent resident of the United States. To apply, please submit your curriculum vitae, transcripts, three letters of recommendation, and a letter of application describing your professional background, interests and goals to Momina Malik, Academic Program Coordinator, Johns Hopkins University, 733 N. Broadway, Suite 811, Baltimore, Maryland 21205, phone 443-287-2953 or email her all documents at dvmtraining@jhmi.edu.
