Clinical Veterinarian, Washington University, St. Louis

Job Description Summary
This position is for a laboratory animal veterinarian who can provide preventative, emergency and clinical veterinary care for Washington University’s research program. We have a very large and engaging program with approximately 500K sf of animal space, 10 veterinarians, a diagnostic lab, AAALAC-accreditation, and meaningful translational research successes.

The Division of Comparative Medicine (DCM) is engaged in an exciting growth phase with the 2023 occupancy of a new $616M neuroscience research facility with a state-of-the-art infrastructure, and the capacity to hold over 35,000 cages of rodents. Additionally, our entire biomedical research program continues to grow in size and funding support our existing programs in large animal surgery, non-human primate medicine, small animal medicine, and laboratory diagnostics.

Consistently ranked among the top medical schools by U.S. News and World Report, Washington University School of Medicine is one of the largest recipients of funding for research and training from the National Institutes of Health. The St. Louis metropolitan area is ranked among the nation's most affordable and best places to live, raise a family, and enjoy life. St. Louis offers a wide variety of cultural events, sports, and recreational activities in a vibrant and verdant setting. Overall, a nice mixture of metropolitan and rural options.

For this position, we are seeking a veterinarian with an interest in large animal surgical models, innovative translational research, a flexibility and interest to learn new skills, and a professional goal of making a niche for themselves as an essential contributor to our research program. If this sounds like you, we look forward to hearing from you.
