Postdoctoral Training in Laboratory Animal Medicine. The University of Illinois at Chicago, Biologic Resources Laboratory, has two postdoctoral positions available for academically oriented veterinarians interested in acquiring training in laboratory animal medicine. Requirements: DVM or equivalent degree; licensed to practice veterinary medicine in the United States; and graduate of a veterinary college accredited by the AVMA. The three-year postdoctoral training program includes clinical and managerial experience in a large, full-service academic animal care program; training in laboratory science and medicine; participating in formal course work and special training in research methodology; and teaching technical and graduate level courses. A two-year track is an option for select candidates that meet eligibility requirements. The program is designed to provide trainees with the didactic and experiential training necessary to prepare for a career in laboratory animal medicine and to obtain ACLAM certification. Appointment is for one year and is renewable for the second and third years with a stipend of $48,500 and includes weekend, holiday and irregular duty hours. One applicant will be accepted to start on July 1, 2020 and a second to start on January 1, 2021. Interested candidates must submit via e-mail: 1) letter of intent that describes your interest in laboratory animal medicine, previous experiences related to this field, and careers goals, 2) curriculum vitae, 3) veterinary college transcripts, and 4) three letters of reference to Dr. Lisa Halliday at lhall@uic.edu. The application deadline is February 28, 2020.

The University of Illinois at Chicago is an AA/EOE.
