Assistant Director of Comparative Medicine Services, Tufts University, Boston, MA

Tufts Comparative Medicine Services (CMS) is seeking an Assistant Director to lead Preclinical Services in Boston, MA and set the strategic direction and broad goals for this service and team. Preclinical Services provides an array of in vivo services to support preclinical and biomedical research to the University, Tufts Medical Center, industry and academic research laboratories in MA, the New England area, and globally. This role oversees and provides programmatic oversight of the surgical research lab, Preclinical Services, Preclinical Imaging Core, and the Rodent Breeding Service. This position will be responsible for implementing veterinary health care for the animals and developing appropriate animal models for research, including drug and device development studies. As part of this work, this role serves as a liaison to preclinical external collaborators, provides veterinary animal model consultation, document preparation, animal research project development, and surgical assistance in studies involving rodents, rabbits, pigs, ferrets, dogs, sheep, human cadaver specimens and other animal species. Requirements for consideration include: ACLAM certification, DVM (or equivalent) with license to practice in MA and a minimum of 5 years of related experience.
