Health and Colony Management of Laboratory Fish
August 9-14, 2020

For principal investigators, technicians, trainees, core managers, veterinarians, and veterinary technicians who utilize or plan to utilize fish models in laboratory research.

- Learn how to maintain the health of a colony of aquatic organisms
- Learn through lectures, discussions, and laboratory exercises
- Discuss unusual and/or unsolved diagnostic case experiences from your home laboratories as problem-solving exercises

This course is approved by the AAVSB RACE (American Association of Veterinary State Boards Registry of Approved Continuing Education) to offer a total of 33 CE (Continuing Education) Credits to veterinarians and veterinary technicians.
